### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 36, line 2, the dependency has been changed from 25 to 35 .

2. In view of the amendment to the claims filed 5/21/2007 and the applicant's traverse of the 4/20/2007 restriction requirement, the restriction between group I and group II, and between species 1-6 has been withdrawn.

3. As previously noted in the office action mailed 10/27/2006, the oath or declaration filed 7/12/2004 is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02. The oath or declaration is defective because: it is written in the French language and therefore the text cannot be readily understood.

### REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or teach the initiator assembled from a first and a second sub-assembly, the internal diameter  $D_1$  of the first sub-assembly being smaller than the external diameter  $D_2$  of the hollowed portion of the second sub-assembly in the regions of the first and second sub-assemblies that are disposed opposite one another during

ultrasonic welding, in combination with the other claimed structural details of independent claim 21. The criticality of the relationship of the diameter  $D_1$  being smaller than  $D_2$  can be found in the specification on page 4, lines 11-17, "...this differential diameter between  $D_1$  and  $D_2$  ensures maximum hermeteicity and sufficient dielectric rigidity for insulation of the internal conducting parts 11, 12 of-the initiator...", and on page 3, lines 32-34, of the specification... "The small internal diameter of the first sub-assembly 2 enables advantageously to do away with any intermediate pyrotechnic content such as, for example, a ring added on the socket 3 to limit the pyrotechnic charge 6".

5. This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to /James S. Bergin/ whose telephone number is 571-272-6872. The examiner can normally be reached on Monday - Wednesday and Friday, 8.30 - 5.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 571-272-6873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
